15

22. (New) A secure printer system comprising:

(a) an electronic device having a first compartment and a second compartment, wherein the first compartment is secure and comprises a door and a door locking mechanism; and

(b) a printer system positioned in the second compartment, wherein the printer system is accessible from the secure first compartment.

23. (New) The secure printer system of claim 22, wherein the second compartment is a secure compartment.

10 24. (New) The secure printer system of claim 22, wherein the second compartment is an unsecured compartment.

25. (New) The secure printer system of claim 22, wherein the secure first compartment and the second compartment are separated by a wall.

26. (New) The secure printer system of claim 25, wherein the secure first compartment further comprises a printer locking mechanism that engages the printer system.

27. (New) The secure printer system of claim 26, wherein the printer locking mechanism comprises a spring biased pin.

28. (New) The secure printer system of claim 22, wherein the printer system comprises a support frame, a chassis engaged with the support frame and a printer assembly removably attached to the chassis.

- 29. (New) The secure system of claim 28, wherein the printer assembly comprises:
 - (a) a printer for printing on printable media; and
 - (b) a controller for controlling the printer.
- 30. (New) The secure system of claim 29 wherein the printer system further comprises a media holder for storing printable media wherein the media holder is positioned beneath the printer assembly.
 - 31. (New) The secure system of claim 30, wherein the printable media is fully exposed when the printer assembly is removed from the printer system.
 - 32. (New) The secure system of claim 31, wherein the printer system further comprises glides for slidably engaging the chassis with the support frame in a lateral direction.
- 33. (New) The secure system of claim 32, wherein the printer assembly comprises a pin for engaging a slot in the chassis.
- 34. (New) The secure system of claim 33, wherein the printer system further comprises a locking mechanism for securing the chassis in a closed position on the support frame.

36. (New) The secure printer system of claim 22, wherein the device is a gaming device.

36. (New) The secure printer system of claim 22, wherein the device is an automatic teller machine.

37. (New) A secure printer system comprising:

(a) an electronic device having a secure compartment and a printer compartment, wherein the secure compartment comprises a door, a door locking mechanism and a printer locking mechanism; and

(b) a printer system positioned in the printer compartment, wherein the printer system is accessible through the secure compartment, and wherein the printer locking mechanism engages the printer system from the secure compartment.

38. (New) The secure printer system of claim 37, wherein the secure compartment and the printer compartment are separated by a wall.

39. (New) The secure printer system of claim 37, wherein the printer system comprises a support frame, a chassis engaged with the support frame, a printer assembly removably attached to the chassis and a media holder for storing printable media.

40. (New) The secure printer system of claim 39, wherein the printer locking mechanism comprises a spring biased pin that engages the chassis of the printer system.
